Hyperbaric Ozone Therapy or Multi-Pass Ozone Therapy is a novel procedure invented by Dr. Johann Lahodny, an Austrian Gynaecologist, for the treatment of chronic diseases. It consists of mixing blood with high concentrations of ozone under high atmospheric pressure and re-infusing it back into the patient. Upto 2L of blood is ozonated during the procedure.

CANCER

WHAT WE OFFER

High Dose Vitamin C Therapy:

Clinically and through research, it has been proven that high doses of Vitamin C has a killing effect on cancer cells specifically while causing no harmful side effects or allergic reactions.

Medical Ozone Therapy:

Ozone therapy kills cancer cells directly by destroying its cell walls and indirectly by boosting the immune system which in turn attacks the cancer cells.

Chelation:

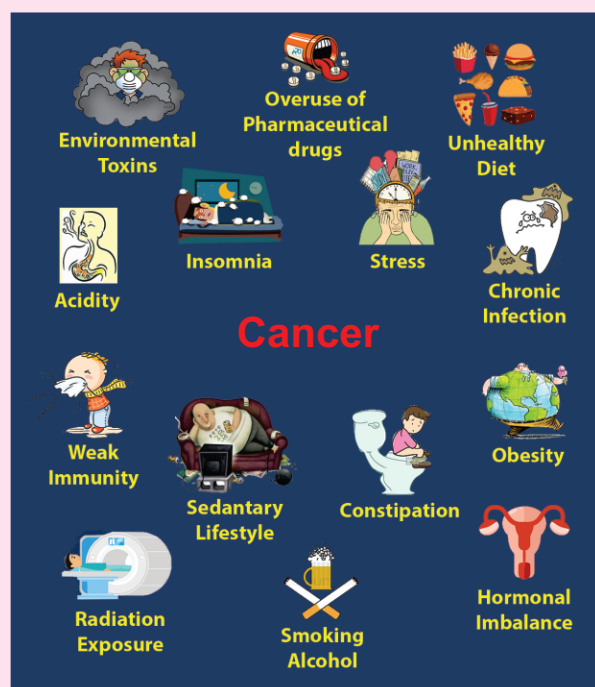

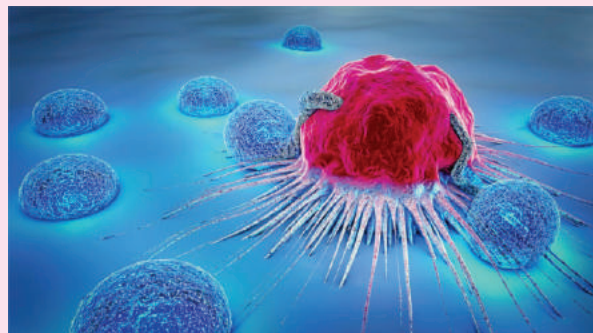

Chelation helps to remove the toxins released by the destroyed tumor cells. It also plays a role in the prevention of cancer by removing the heavy metals present in our body.

Mistletoe:

Mistletoe is a plant extract which kills cancer cells through Natural Killer cell mediated lysis. It also boosts the immune system and improves the quality of life.

Other Therapies:

Exercise with Oxygen Therapy (EWOT), Near Infra-Red Sauna, IV Nutrients, Liver Flush, Hydro Colon Therapy.

Cancer involves abnormal cell growth with the potential to invade or spread to other parts of the body. Cancer does not have one single cause but is due to a multitude of factors.

“Cancer is not a genetic disease but a metabolic mitochondrial one.”
